DETAILED ACTION

Allowable Subject Matter

1. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach a first movable support, disposed upon the first support section proximate to the first rotatable mount, wherein the first end of the workpiece can be locked into a position when placed in contact with the first movable support, and a second movable support, disposed upon the second support section proximate to the second rotatable mount, wherein the second end of the workpiece can be locked into a position when placed in contact with the second movable support. Ferris '981 merely discloses a chain (27) that is used to limit the movement of a frame (24). By definition, the first and second supports claimed by applicant indicate that they can carry the load of a workpiece, whereas the chain (27) in Ferris '981 only limits the movement of the frame. Furthermore, as argued by the applicant, the workpiece in Ferris '981 is the rug, not the frame (24) used to make the rug.
